Objective

Ambitious and motivated engineering graduate seeking an entry-level position in **Data Science or Data Analysis** where I can apply my knowledge of **Python, machine learning, and data analytics** to extract meaningful insights from data. Eager to contribute to data-driven decision making while continuously enhancing my analytical and technical skills.

Education

- **MadanaPalle Institute of Technology and Science** MadanaPalle, Andhra Pradesh BTech in Computer Science, DS (Percentage of 87) Jul 2021 – May 2025
- **Sri Chaitanya Junior College** Tirupati, Andhra Pradesh
HSC (Score 966/1000) Jun 2019 – May 2021
- **Viswa Jyothi High School** Kalakada, Andhra Pradesh
SSC (GPA of 10/10) Jun 2018 – Apr 2019

Skills

- **Programming Languages:** Java, Python
- **Data Science Libraries :** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, NLTK, SpaCy
- **Machine Learning :** Regression, Classification, Clustering, Time Series Forecasting, Recommendation Systems
- **Natural Language Processing :** Text Preprocessing, Sentiment Analysis, Topic Modeling, Named Entity Recognition (NER)
- **Generative AI :** GPT-based Models, LangChain, Fine-tuning LLMs
- **Data Visualization Tools :** Power BI, Matplotlib, Seaborn, Tableau
- **Databases:** MySQL, PostgreSQL
- **Analytics :** Customer Segmentation, Market Basket Analysis, Demand Forecasting
- **Soft Skills:** Problem Solving, Team Collaboration, Time Management, Fast Learner, Adaptability **Internships**

- **Data Scientist** Bengaluru, Karnataka
Infibyte Solutions Pvt Ltd Python, Machine Learning, NLP, Power BI, Generative AI
 - Performed **data collection, cleaning, and preprocessing** using **Python (Pandas, NumPy)** to ensure reliable datasets for analysis.
 - Conducted **Exploratory Data Analysis (EDA)** to identify patterns, trends, and anomalies supporting data-driven decisions.
 - Developed and evaluated **Machine Learning models** for prediction and forecasting to improve business planning accuracy.
 - Designed **interactive dashboards and BI reports** using **Power BI, Tableau, and Excel** to visualize key business KPIs.
 - Implemented **Generative AI and NLP techniques** to analyze customer feedback and automate insight summarization.
 - Collaborated with cross-functional teams to convert business problems into **data-driven solutions and strategic insights**.

Projects

- **GenAI Shopping & Product Discovery Assistant (RAG)**
- Built a GenAI assistant that answers product questions and recommends alternatives using grounded retrieval over catalog, policy, and FAQ documents with citations and safety checks.

- **Role:** GenAI / Data Science Engineer
- **Skills/Tools:** Python, Azure OpenAI, LangChain, Azure AI Search (Vector), Embeddings, Prompt Engineering, Key Vault
- **Roles & Responsibilities:**
 - Implemented RAG ingestion pipeline (catalog/FAQ), chunking strategies, and metadata-based filtering for relevance.
 - Designed prompts for grounded answers with citations, refusal logic, and structured JSON outputs for UI rendering.
 - Improved retrieval quality using hybrid search, reranking strategies, and query rewriting for ambiguous questions.
 - Created offline eval sets (golden Q&A) and measured faithfulness/relevance to guide prompt and retrieval iterations.
 - Integrated observability logs (latency/cost/error types) and established rollout checks for safe production use.

Agentic AI for Pharmacovigilance Case Triage

- Developed an agentic workflow to extract fields from narratives, categorize case seriousness, and route cases to the right queue with validation and human-in-the-loop checkpoints.
- **Role:** Agentic AI Engineer
- **Skills/Tools:** Python, Azure OpenAI, LangGraph, Structured outputs, Tool calling, Pydantic, Evaluation
- **Roles & Responsibilities**
 - Designed an extraction + routing agent that outputs structured fields (drug, event, dates) with schema validation.
 - Added tool calls for terminology lookup and consistency checks to reduce extraction errors.
 - Implemented confidence-based HITL gating for borderline cases and maintained audit-ready logs.
 - Built regression tests with labeled samples to evaluate extraction accuracy and routing correctness.
 - Optimized prompts for stability and ensured consistent formatting across model versions.

Certifications

- **Professional Google Data Analytics** - Coursera
- **IBM Python Data Science** - EdX
- **Certified in Soft Skills Training Programme** - Corporate Professional Behavior
